DIVThe distinguished educator and philosopher discusses his revolutionary vision of education, stressing growth, experience, and activity as factors that promote a democratic character in students and lead to the advancement of self and society. /div

This report is based on an exhaustive review of the published literature on the definitions, measurements, epidemiology, economics and interventions applied to nine chronic conditions and risk factors. In this book students will be able to follow the story of how sociology has come to engage with lesbian and gay issues from the 1950s to the

present.

This powerful study opens a critical perspective on the slow death of socialism and the rebirth of capitalism in the world's most dynamic and populous country. Based on remarkable fieldwork and extensive interviews in Chinese textile, apparel, machinery, and household appliance factories, *Against the Law* dissects the world of Chinese workers today and finds a rising tide of labor unrest mostly hidden from the world's attention. Intense working-class agitation is being spurred by massive unemployment of Mao's socialist proletariat in the northern rustbelt and by the exploitation of millions of young workers in the southern sunbelt. Providing a broad comparative political and economic analysis of the vast mosaic of this labor struggle together with unprecedented fine-grained ethnographic detail, the book portrays the multi-faceted humanity of the Chinese working class as their stories unfold in bankrupt state factories and global sweatshops, in crowded dormitories and remote villages, at heroic moments of street protests as well as in quiet disenchantment with the corrupt officialdom and the fledgling legal system.

Community Power and Grassroots Democracy

This book explores the grass-roots movement for legal protection on the basis of sexual orientation. After discussing the social and political background of the gay and lesbian rights movement, the authors examine the conditions that enabled or blocked passage of local legislation in various communities; the scope, implementation, and impact of such laws; the effect of the movement on public schools; and the nature of the political opposition.

Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.

This manual will ensure that the management of massive fatalities forms part of disaster preparedness and response plans, and that it is a fundamental aspect of humanitarian assistance to survivors and rehabilitation and reconstruction programs. In this book, the authors argue for instigated property exchange--a concept applied in a land-assembly method commonly known in the literature as land readjustment.

The author finds that agrarian radicalism develops most readily in a way analogous to industrial class struggle: through the economic clash of homogeneous and polarized groups within the agrarian sector. In the first book-length study of Progressive-Era presidents' views on the theme of self-government, *The Dilemma of Progressivism* critically analyzes their understanding of executive leadership and the office of the presidency. Will Morrissey examines both the rhetoric and the actions of Theodore Roosevelt, William Howard Taft, and Woodrow Wilson to show the ways in which their thought shaped their presidencies. He shows how the Progressive presidents dealt with the genesis of a modern, centralized American state and the conflicting increase in popularity of the notion of self-government. Drawing larger conclusions about the key American ideas of self-

government, federalism, freedom, and social welfare, Morrisey strikes the right balance between political theory and history in this study on self-government and the political thought of three American presidents.

Despite recent advances in important aspects of the lives of girls and women, pervasive challenges remain. These challenges reflect widespread deprivations and constraints and include epidemic levels of gender-based violence and discriminatory laws and norms that prevent women from owning property, being educated, and making meaningful decisions about their own lives--such as whether and when to marry or have children. These often violate their most basic rights and are magnified and multiplied by poverty and lack of education. This groundbreaking book distills vast data and hundreds of studies to shed new light on deprivations and constraints facing the voice and agency of women and girls worldwide, and on the associated costs for individuals, families, communities, and global development. The volume presents major new findings about the patterns of constraints and overlapping deprivations and focuses on several areas key to women s empowerment: freedom from violence, sexual and reproductive health and rights, ownership of land and housing, and voice and collective action. It highlights promising reforms and interventions from around the world and lays out an urgent agenda for governments, civil society, development agencies, and other stakeholders, including a call for greater investment in data and knowledge to benchmark progress.

This work sets out to ask hard questions about the success of popular participation, local democracy and grassroots organizing. It is exciting if community participation leads to empowerment, development and socio-political transformation, but what of the obstacles - the power of central bureaucracies, the lack of local skills and organizational experience, the impact of national and transnational structures, and social divisions? The contributors, drawing on years of research experience in Central America and the Caribbean, document the strengths and weaknesses, the limits and the potential, of community initiatives in the South. By combining the new social movements approach with resource mobilization theory, they aim to help the reader to understand the rich variety of community-based forms of popular power and their contribution to solving the development crisis of the South. The book pays great attention to gender relations and the role of women.

Community organizers build solidarity and collective power in fractured communities. They help ordinary people turn their private pain into public action, releasing hidden capacities for leadership and strategy. In *Collective Action for Social Change*, Aaron Schutz and Marie G. Sandy draw on their extensive experience participating in community organizing activities and teaching courses on the subject to empower novices to think like an organizers.

While a decade ago much of the discussion of new media in Asia was couched in Occidental notions of Asia as a "default setting" for technology in the future, today we are seeing a much more complex picture of contesting new media practices and production. As "new media" becomes increasingly an everyday reality for young and old across Asia through smartphones and associated devices, boundaries between art, new media, and the everyday are transformed. This Handbook addresses the

historical, social, cultural, political, philosophical, artistic and economic dimensions of the region's new media. Through an interdisciplinary revision of both "new media" and "Asia" the contributors provide new insights into the complex and contesting terrains of both notions. The Routledge Handbook of New Media in Asia will be the definitive publication for readers interested in comprehending all the various aspects of new media in Asia. It provides an authoritative, up-to-date, intellectually broad, conceptually cutting-edge guide to the important aspects of new media in the region – as the first point of consultation for researchers, advanced level undergraduate and postgraduate students in fields of new media and Asian studies.

will require a transformation of health systems away from disease based curative models and towards the provision of older-person-centred and integrated care. It will require the development sometimes from nothing of comprehensive systems of long term care. It will require a coordinated response from many other sectors and multiple levels of government. And it will need to draw on better ways of measuring and monitoring the health and functioning of older populations. These actions are likely to be a sound investment in society's future. A future that gives older people the freedom to live lives that previous generations might never have imagined. The World report on ageing and health responds to these challenges by recommending equally profound changes in the way health policies for ageing populations are formulated and services are provided. As the foundation for its recommendations the report looks at what the latest evidence has to say about the ageing process noting that many common perceptions and assumptions about older people are based on outdated stereotypes. The report's recommendations are anchored in the evidence comprehensive and forward-looking yet eminently practical. Throughout examples of experiences from

different countries are used to illustrate how specific problems can be addressed through innovation solutions. Topics explored range from strategies to deliver comprehensive and person-centred services to older populations to policies that enable older people to live in comfort and safety to ways to correct the problems and injustices inherent in current systems for long-term care.

Like the postcolonial world more generally, Southeast Asia exhibits tremendous variation in state capacity and authoritarian durability. *Ordering Power* draws on theoretical insights dating back to Thomas Hobbes to develop a unified framework for explaining both of these political outcomes. States are especially strong and dictatorships especially durable when they have their origins in 'protection pacts': broad elite coalitions unified by shared support for heightened state power and tightened authoritarian controls as bulwarks against especially threatening and challenging types of contentious politics. These coalitions provide the elite collective action underpinning strong states, robust ruling parties, cohesive militaries, and durable authoritarian regimes

- all at the same time. Comparative-historical analysis of seven Southeast Asian countries (Burma, Indonesia, Malaysia, the Philippines, Singapore, South Vietnam, and Thailand) reveals that subtly divergent patterns of contentious politics after World War II provide the best explanation for the dramatic divergence in Southeast Asia's contemporary states and regimes. Social Movements is a comprehensive introduction and critical analysis of collective action in society today. In this new edition, the authors have updated all chapters with the most recent scientific literature, expanded on topics such as individual motivations, new media, public policies, and governance. Draws on research and empirical work across the social sciences to address the key questions in this international field. New edition expands on topics such as individual motivations, new media, public policies, and governance. Has been redesigned in a more user-friendly format.

This is the first comprehensive study of the political philosophy of the British philosopher R. G. Collingwood, best known for his contributions to aesthetics and the philosophy of history. However his political thought, and in particular his book *The New Leviathan*, have been neglected, even dismissed in some quarters. Professor Boucher argues for the importance of this political theory and provides a perspicuous account of its development and originality. He contends that *The New Leviathan* is an attempt to reconcile philosophy and history, theory and practice. Collingwood's distinctive contribution to modern

political and social thought is seen as his sustained project of distinguishing utility from right, and right from duty; the passion for history coincides with the ethical thought because Collingwood wishes to identify dutiful, or moral, action with a historical civilization. Drawing on a wealth of manuscript material, this book will prove invaluable to political philosophers and intellectual historians.

The Handbook of Economic Sociology, Second Edition is the most comprehensive and up-to-date treatment of economic sociology available. The first edition, copublished in 1994 by Princeton University Press and the Russell Sage Foundation as a synthesis of the burgeoning field of economic sociology, soon established itself as the definitive presentation of the field, and has been widely read, reviewed, and adopted. Since then, the field of economic sociology has continued to grow by leaps and bounds and to move into new theoretical and empirical territory. The second edition, while being as all-embracing in its coverage as the first edition, represents a wholesale revamping. Neil Smelser and Richard Swedberg have kept the main overall framework intact, but nearly two-thirds of the chapters are new or have

new authors. As in the first edition, they bring together leading sociologists as well as representatives of other social sciences. But the thirty chapters of this volume incorporate many substantial thematic changes and new lines of research--for example, more focus on international and global concerns, chapters on institutional analysis, the transition from socialist economies, organization and networks, and the economic sociology of the ancient world. The Handbook of Economic Sociology, Second Edition is the definitive resource on what continues to be one of the leading edges of sociology and one of its most important interdisciplinary adventures. It is a must read for all faculty, graduate students, and undergraduates doing work in the field. Community Practice is a comprehensive resource for social workers and students eager to learn how to practice effectively in complex systems and diverse communities. In this completely revised edition of the definitive text in the field, the authors have thoroughly updated each chapter and added two entirely new chapters on community building and community organizing. New material on topics such as negotiation and mediation, community advocacy, participatory rural appraisal, the narrative approach to social change, community involvement, representative client boards, and the latest in grassroots endeavors make this text as inspiring as it is practical. Drawing upon the wealth of information available from local organizations, the Internet,

newspapers, and academic journals, the authors introduce contemporary experiments and analyze classic modes of community practice and change. The content, exercises, and references offer instructors the flexibility necessary to tailor their courses to undergraduate, graduate, and doctoral level students. This new edition will continue to provide a comprehensive and integrated overview of the theory and skills fundamental to all areas of social work practice. Broad in scope, it offers students as well as practitioners the tools necessary to promote the welfare of individuals and communities.
