

Curriculum Of Excellence

This paper is relevant to all those involved in promoting effective learning for children and young people from 3 to 18. It particularly outlines important messages for those involved in planning the curriculum for children and young people. It builds on A Curriculum for Excellence: Progress and Proposals, provides guidance on a new framework and sets out considerations which are critical to the adoption of Curriculum for Excellence.

A fresh look at the Curriculum for Excellence in Scottish schools, both the successes and room for improvement, together with a comparison of the education systems in Scotland and Finland. This comprehensive analysis of recent changes in the examination syllabus, feedback from teachers and the relevant observations of student motivation, satisfaction and results provides a basis for presenting a way forward for Scotland to re-establish its position as a leader in education. Mamie Philp is an educator and writer, based in Edinburgh.

A themed collection of poems about contemporary Scottish education. Insightful, irreverent, light-hearted and essentially honest take on the chaos within the system.

Students in Scotland (United Kingdom) engage in learning through Curriculum for Excellence (CfE), which aims to provide them with a holistic, coherent, and future-oriented approach to learning between the ages of 3 and 18. CfE offers an inspiring and widely supported philosophy of education. This report analyses the progress made with CfE since 2015, building upon several months of observations in Scotland, the existing literature and experiences from other OECD countries.

An analysis of modern curricular policy trends, drawing upon Scotland's Curriculum for Excellence, and featuring inputs from acknowledged experts in the field.
