"Texts must be interesting enough for students to want to read them in their own language. Otherwise, how can we expect students to want to read them in English?" This is the authors' golden rule when they choose texts and topics for every level of American English File. It ensures you get material that learners will enjoy reading and will want to talk about. Texts such as "Could you live without money?" really help to generate opinion and discussion. They create a desire to communicate. Having created the desire, American English File then helps you to develop learners' communication skills. One way it does this is with a strong focus on pronunciation. Research shows that poor pronunciation is a major contributor to breakdowns in communication (Jennifer Jenkins: The Phonology of English as an International Language). American English File integrates pronunciation into every lesson - the "little and often" approach. But that's not all. The unique English File Sounds Chart puts a picture to each sound in the phonetic alphabet, so learners find it easier to remember the sounds and, ultimately, improve their pronunciation.

100% new. New Practical English video, featuring authentic interviews with real people. Shorter syllabus for Beginner-level students.

Get your students talking with these themed conversation classes consisting of a set of conversation cards and an activity sheet containing relevant vocabulary, idioms and grammar points. The basis of a good conversation class is giving learners a reason and an opportunity to speak and scaffolding that speaking with lexis and grammatical structure as it's needed. The most fruitful conversations arise spontaneously and there is an art to listening well and asking the right questions to in order to uncover the nuggets of universal interest which provoke stimulating classroom discussion. However, some days we come up empty handed, maybe our learners are tired or reluctant to publicly speak up. Here it is also the teacher's role to give learners a gentle push into areas which hopefully will create intellectual arousal and thus opportunities for the teacher to support this output with appropriate input. The activities in this book are intended to facilitate and support rich and stimulating conversation and are not designed to produce standardized lessons. Each unit contains many possible branching off points which can be either pursued in more depth or accepted at face value.

Python for Everybody is designed to introduce students to programming and software development through the lens of exploring data. You can think of the Python programming language as your tool to solve data problems that are beyond the capability of a spreadsheet.Python is an easy to use and easy to learn programming language that is freely available on Macintosh, Windows, or Linux computers. So once you learn Python you can use it for the rest of your career without needing to purchase any software.This book uses the Python 3 language. The earlier Python 2 version of this book is titled "Python for Informatics: Exploring Information".There are free downloadable electronic copies of this book in various formats and supporting materials for the book at www.pythonlearn.com. The course materials are available to you under a Creative Commons License so you can adapt them to teach your own Python course.

Diving deep into the JavaScript language to show you how to write beautiful, effective code, this book uses extensive examples and immerses you in code from the start, while exercises and full-chapter projects give you hands-on experience with writing your own programs. --

The second edition of this best-selling Python book (100,000+ copies sold in print alone) uses Python 3 to teach even the technically uninclined how to write programs that do in minutes what would take hours to do by hand. There is no prior programming experience required and the book is loved by liberal arts majors and geeks alike. If you've ever spent hours renaming files or updating hundreds of spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? In this fully revised second edition of the best-selling classic Automate the Boring Stuff with Python, you'll learn how to use Python to write programs that do in minutes what would take you hours to do by hand--no prior programming experience required. You'll learn the basics of Python and explore Python's rich library of modules for performing specific tasks, like scraping data off websites, reading PDF and Word documents, and automating clicking and typing tasks. The second edition of this international fan favorite includes a brand-new chapter on input validation, as well as tutorials on automating Gmail and Google Sheets, plus tips on automatically updating CSV files. You'll learn how to create programs that effortlessly perform useful feats of automation to:

- Search for text in a file or across multiple files
- Create, update, move, and rename files and folders
- Search the Web and download online content
- Update and format data in Excel spreadsheets of any size
- Split, merge, watermark, and encrypt PDFs
- Send email responses and text notifications
- Fill out online forms

Step-by-step instructions walk you through each program, and updated practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Don't spend your time doing work a well-trained monkey could do. Even if you've never written a line of code, you can make your computer do the grunt work. Learn how in Automate the Boring Stuff with Python, 2nd Edition.

English File's unique, lively and enjoyable lessons are renowned for getting students talkingEnglish File, fourth edition, has been built on tried and trusted methodology and contains uniquely motivating lessons and activities that encourage students to discuss topics with confidence.NEW TO THIS EDITIONNew and updated texts, topics, and listenings, based on feedback from English File teachersEach Student Book comes with access to new Online Practice, providing learners with extra practice and activities for each FileOnline Practice includes new Sound Bank videos, with the unique opportunity to watch a native speaker pronounce the sound, and new interactive videos where students can take part in the drama themselvesNew video listening activities are integrated into each even-numbered File. These short documentaries and dramas make class time more dynamic and excitingThe Classroom Presentation Tool shows the course content on screen, making it easier for you to deliver engaging lessonsTeacher's Resource Centre allows you to manage all English File resources and download teaching materials in one place.Find out more here

Grammar, pronunciation, and vocabulary practice for every lesson Practical English Revision quizzes MultiROM with video, audio, practice activities, and audio

The English File fourth edition Student's Book is packed full of interesting content to keep students of all abilities fully engaged and motivated. The English File fourth edition Workbook reinforces what is learned in each English File lesson, and can be used as extra practice during class, or set as homework.

**Summary Deep Learning with Python introduces the field of deep learning using the Python language and the powerful Keras library. Written by Keras creator and Google AI researcher François Chollet, this book builds your understanding through intuitive explanations and practical examples. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the Technology Machine learning has made remarkable progress in recent years. We went from near-unusable speech and image recognition, to near-human accuracy. We went from machines that couldn't beat a serious Go player, to defeating a world champion. Behind this progress is deep learning—a combination of engineering advances, best practices, and theory that enables a wealth of previously impossible smart applications. About the Book Deep Learning with Python introduces the field of deep learning using the Python language and the powerful Keras library. Written by Keras creator and Google AI researcher François Chollet, this book builds your understanding through intuitive explanations and practical examples. You'll explore challenging concepts and practice with applications in computer vision, natural-language processing, and generative models. By the time you finish, you'll have the knowledge and hands-on skills to apply deep learning in your own projects. What's Inside Deep learning from first principles Setting up your own deep-learning environment Image-classification models Deep learning for text and sequences Neural style transfer, text generation, and image generation About the Reader Readers need intermediate Python skills. No previous experience with Keras, TensorFlow, or machine learning is required. About the Author François Chollet works on deep learning at Google in Mountain View, CA. He is the creator of the Keras deep-learning library, as well as a contributor to the TensorFlow machine-learning framework. He also does deep-learning research, with a focus on computer vision and the application of machine learning to formal reasoning. His papers have been published at major conferences in the field, including the Conference on Computer Vision and Pattern Recognition (CVPR), the Conference and Workshop on Neural Information Processing Systems (NIPS), the International Conference on Learning Representations (ICLR), and others. Table of Contents PART 1 - FUNDAMENTALS OF DEEP LEARNING What is deep learning? Before we begin: the mathematical building blocks of neural networks Getting started with neural networks Fundamentals of machine learning PART 2 - DEEP LEARNING IN PRACTICE Deep learning for computer vision Deep learning for text and sequences Advanced deep-learning best practices Generative deep learning Conclusions appendix A - Installing Keras and its dependencies on Ubuntu appendix B - Running Jupyter notebooks on an EC2 GPU instance**

English File's unique, lively and enjoyable lessons are renowned for getting students talking. In fact, 90% of English File teachers we surveyed in our Oxford Impact Study found that the course improves students' speaking skills.\*How will English File get your students' talking?Lessons and activities that provide the necessary language, motivation and opportunity for students to talk with confidence.Learners build confidence to communicate with a proven balance of Grammar, Vocabulary, Pronunciation and Skills Development in every File.Teachers and students have access to all their English File resources - video, audio, worksheets and much more - in one easy to manage place.\*The English File Oxford Impact Study was conducted in January and February 2018. Oxford Impact is how Oxford University Press evaluates its educational products and services so that teachers and learners can be sure that our resources make a positive difference.Each Student's Book comes with access to new Online Practice that is directly linked to each Student's Book.
