

Instructors Resource Guide To Accompany Chemistry Chemical Reactivity

Promoting learning as an activity of the reader, this guide shows how active learning can motivate and excite readers to a deeper understanding of introductory psychology. With balanced and modern treatment of gender and culture, this book encourages readers to develop critical thinking skills. It is organized around the SQ4R (survey, question, read, recite, review) method of learning.

Ethical issues relating to research and the aspects of business, data collection, and data analysis are integrated throughout the book. The issues in cross-national research in sampling and data collection are thoroughly discussed. The qualitative-quantitative aspects of research are brought together through a case study on the final chapter.
