

International Express Working Travelling Socializing Upper Intermediate Students Book With Pocket Book And Multirom

International express : [working , travelling, socializing]. Upper-intermediate : Student's book [with pocket book and MultiROM]Oxford University Press, USA

In recent years there has been a considerable interest in the cultural aspects of tourism such as the impacts of culture on tourism planning, development, management, and marketing. However, the focus has been on material forms of culture such as arts, music, or crafts. The impacts of national culture on tourist behavior and travel decision-making have not been paid much attention. Only in the last two years have cross-cultural issues begun to generate significant interest among academics. An examination of cultural characteristics and differences is extremely important to the tourism industry because today's tourism environment is becoming increasingly international. Information on the nature of the cultural differences between international tourists and locals is not readily available in tourism literature. The concept of culture is very complex and includes such abstract concepts as satisfaction, attitude and loyalty. International Tourism brings these concepts to the undergraduate student in tourism, as well as students in the related fields of marketing, management, international business, and cross-cultural communication. Designed as a textbook, it is organized and presented in an integrated and relevant way for the benefit of a worldwide audience.

This edited collection provides a state-of-the art overview of research on willingness to communicate (WTC) in a second and foreign language. In particular, it includes innovative studies seeking to demonstrate the ways in which WTC can be examined within the framework of complex dynamic systems, how the construct is related to self-assessment, reticence and extroversion, and what is signified in the case of immigrants. Another group of papers is related to the role of technology in fostering WTC in different contexts. The volume also comprises papers that touch on methodological issues in the study of WTC such as experience case sampling, the network approach or the integration of the macro- and micro-perspective. The book will be of value to researchers interested in the study of WTC but will also provide inspiration for students, teachers and materials writers.

The goal of this book is to provide tuition and guidance for professionals, professionals-to-be and other interested parties regarding the correct way to express themselves in English in the professional world. In order to make the most of it and do so in a comfortable way, the starting level of English knowledge should be at least B1 (intermdiate). These materials are intended, firstly, to support learning within and outside the classroom and, secondly, to enable the student to acquire his/her own the strategies and techniques necessary both to understand and produce a wide range of formal Eglish texts and documents, and also interact in a number of communicative situations at work.

This book examines the lives and works of famous filmmakers and screen actors through the perspective of bipolar and depressive disorders. The filmmakers discussed in this volume include directors Francis Ford Coppola, Martin Scorsese, Woody Allen, and Tim Burton; as well as actors Carrie Fisher, James Dean, Peter Sellers, and Jim Carrey.

Children's and Families' Holiday Experience is the first volume to consider the active social role of children (0 – 18) as well as parents in shaping the nature of the family holiday experience. It provides significant insights into the holiday desires, expectations, and experiences of children and the families' tourism behaviour, that offers the potential for the tourism industry to plan, develop, and market products that provide a higher quality service to these populations. This book traces the modern history of the demand for and provision of holidays for children and families. As part of this it examines the nature of the holiday desires of parents and children and the roles society and the tourism industry play in influencing these. It provides an analysis of the changing nature of the holiday desires and experiences of children as they evolve through different life stages and the influence this has on the shape of family holidays. Given increasing concerns about child safety and education, this book examines both issues within the tourism experience. Finally, the book analyses how the tourism industry caters to the needs of children and families and offers insights into how this could be improved in the future.

This book argues that China's international socialization of the political elites of Belt and Road Initiative (BRI) partner states is an exceptionally effective instrument of China's current foreign policy. It shows how the BRI-related process of socialization generates shared beliefs in the legitimacy and therefore in the acceptability of a Chinese international order among target elites and how in turn the policies and actions of states controlled by these elites tend to become aligned with the norms 'taught' by the Chinese socializer. It goes on to show how this serves the interests of China's government, firms, and citizens at national, regional, and global levels; and how the resulting increased support for Beijing's version of the international order creates a virtuous circle that further enhances China's international position and potential.

"A provocative look at late 19th-century French fashion, which discredits the couturier as "genius creator" and makes you think differently about the impact of the American women who influenced the market"--

In Backpack Ambassadors, Richard Ivan Jobs tells the story of backpacking in Europe in its heyday, the decades after World War II, revealing that these footloose young people were doing more than just exploring for themselves. Rather, with each step, each border crossing, each friendship, they were quietly helping knit the continent together.

You might think that any reader is a good reader (publishers certainly do). Merve Emre's tongue-in-cheek subtitle calls out "bad" readers—the kind whose approach to literature is naive, superficial, therapeutic, or escapist, at least in the eyes of scholars. They are not properly "literary" readers—not by the standards of university literature classrooms through most of the postwar era. Rather, bad readers read novels, stories, and poems for more vulgar reasons: to be instructed, improved, moved, even to feel civically engaged. In this book, Emre suggests that we think of bad readers not as non-literary but as "parliterary," forged in institutions that have promoted literacy and writing well outside literature departments throughout the postwar period. Emre examines the rise of paraliterary reading and its role in helping readers acclimate to the rise of American power from the years just before World War II through the Cold War. While university literature departments were turning out good readers by the hundreds, other institutions—diplomatic missions, cultural exchange programs, multinational corporations, global activist groups—trained a vastly greater number of bad readers: diplomats, debutantes, tourists, and magazine subscribers. Emre's book explores a series of fascinating questions about American culture during this era: How did women's colleges teach students like Mary McCarthy and Jacqueline Kennedy to read novels? What hopes did idealistic Pathhigh Scholars like Alfred Kazin and F. O. Matthiessen, enlisted to teach American Studies in Europe, carry with them? How did American Express become such a touchstone, both for the counterculture and family-oriented readers? The result is an invigorating and original look at the cultural life of reading during America's postwar ascendancy.
