In the beginning of
2001 Lawrence

showed that Open

have a citation
advantage
(Lawrence, 2001)

over closed access
articles. Since then
several research
studies have arrived
at the same results
(e.g., Archambault et
al., 2015; Wang et

al., 2015).

According to Wang
et al., (2015) OA
citation entails more
advantage by

collecting more
usage metrics and
social media
attention. In recent
years altmetrics
accumulated from
social media are

used and studied by
researchers (Priem,
2011; Piwowar,

interdisciplinary
studies confirm that
altmetrics reveal a
different impact
from citation
nevertheless there's a
positive and

with each other

(Costas et al., 2014;

information

differentiates from a

discipline to a

discipline where the

amount of papers

found varies across

sources. Nuredini
and Peters (2015)
reveal the top 3 most
used altmetric

(EBS) whereas
Costas et al. (2014)
outline that

to see whether
openness can lead to
more attention
online in comparison
with closed journals.

Therefore the study looks at OA journals and their altmetric information in the field of EBS and

aims at answering the following research questions:
