

Sunexpert

From the chaos of the early DARPA, ARPANET and NSF-funded NSFNET has emerged a globe-spanning communications facility we today call simply "The Internet." It has become so commonplace and so taken for granted that Wired News has decreed that writers should no longer capitalize it. This tale is not singularly focused on the past. It tells not only how we got here, but where we think the Commercial Internet must go. For all its greatness, today's Internet has serious shortcomings. Theft of personal data, identity theft, online scams, and advertising fraud run rampant, with online dollars diverted to organized crime. Insecure systems, poor security practices and an attitude of secrecy and reluctance to acknowledge failings inhibit real solutions. We propose a way forward, a networking future that is bright, optimistic, and secure.

Analysis procedures, hardware platforms and software systems for the analysis of digital topographic data, satellite images, and generic time series have been developed. These have been implemented in a distributed processing environment on commonly available platforms and are available over Internet. Contact lerneratIdeo. Columbia. Edu for details. Our imaging analysis methodologies have been applied to the southern border regions of the former Soviet Union. This area contains some of the most interesting tectonics on the planet and until recently has been relatively inaccessible to modern field programs. We demonstrate how views of available digital data sets can be combined to yield new insight and overviews of tectonic setting. A spatial- and time-domain deconvolution methodology based on inverse theory, which offers the advantage of adaptation to noisy data and incorporation of scientific constraints has been developed. It is applied to the problem of singular deconvolution of noisy time series as an example.

India's leading women's English monthly magazine printed and published by Pioneer Book Co. Pvt. Ltd. New Woman covers a vast and eclectic range of issues that are close to every woman's heart. Be it women's changing roles in society, social issues, health and fitness, food, relationships, fashion, beauty, parenting, travel and entertainment, New Woman has all this and more. Filled with quick reads, analytic features, wholesome content, and vibrant pictures, reading New Woman is a hearty and enjoyable experience. Always reinventing itself and staying committed to maintaining its high standard, quality and consistency of magazine content, New Woman reflects the contemporary Indian woman's dreams just the way she wants it. A practical guide for women on-the-go, New Woman seeks to inform, entertain and enrich its readers' lives.

For beginning, intermediate, and advanced users, this book offers complete coverage of UNIX. Offering information on basic UNIX, programming UNIX, communications and networking, the book also discusses new, more advanced tools such as Perl and presents in-depth discussions of the Internet, Windows, Linux, the bestselling UNIX systems, and more.

Put the Strengths of Solaris to Work for Your Organization Mastering Solaris 8 is an indispensable guide to the version of UNIX famed for its network services and robustness as a Web and application server. Inside, you'll find essential information on installing, configuring, and optimizing Sun Microsystems' latest release, along with the step-by-step instruction and expert advice you need to make Solaris the cornerstone of an effective, secure network. Coverage includes: Installing Solaris Logging in and managing sessions Working with commands and utilities Managing files, folders, and directories Using the CDE and OpenWindows desktops Installing and configuring devices Configuring a workstation for networking Setting up and managing network printing Installing programs Working with user and group accounts Backing up and restoring files and folders Using the Mail and Calendar applications Accessing the Internet Using text editors Working with the Bourne, Korn, and C Shells Troubleshooting your workstation or server

Presents the Computer Publishing Group, the publisher of SunExpert Magazine and RS/magazine, two multi-platform UNIX workstation publications. Provides information about the Computer Publishing Group, its editorial staff, and advertising information for the two magazines.

The mathematics employed by genetic algorithms (GAs)are among the most exciting discoveries of the last few decades. But what exactly is a genetic algorithm? A genetic algorithm is a problem-solving method that uses genetics as its model of problem solving. It applies the rules of reproduction, gene crossover, and mutation to pseudo-organisms

Buy a new version of this Connected Casebook and receive access to the online e-book, practice questions from your favorite study aids, and an outline tool on CasebookConnect, the all in one learning solution for law school students. CasebookConnect offers you what you need most to be successful in your law school classes:portability, meaningful feedback, and greater efficiency. Offering comprehensive coverage that is suitable for one or two semester torts courses, Basic Tort Law: Cases, Statutes, and Problems, Fifth Edition's flexible organization accommodates courses that begin either with coverage of intentional torts in Chapter 2 or negligence, beginning with Chapter 3. Chapters 9-17 allow teachers to select additional topics that fit best with their curriculum and interests. Key Features: Cases edited to moderate length, so professors can help students analyze judicial reasoning and treatment of policy implications. Practice-oriented problems in each chapter. A new section on the intentional tort of false imprisonment, covering the concepts of confinement, consent, intentionality, and the shopkeeper's privilege. A new case addressing whether strict liability for abnormally dangerous activities applies to fracking, which, juxtaposed with another featured case, illustrates the differing ways courts have approached the Restatement factors. A new case discussing joint and several liability, offering a straightforward introduction that enhances or may be substituted for a more detailed treatment of this complicated area. CasebookConnect features: ONLINE E-BOOK Law school comes with a lot of reading, so access your enhanced e-book anytime, anywhere to keep up with your coursework. Highlight, take notes in the margins, and search the full text to quickly find coverage of legal topics. PRACTICE QUESTIONS Quiz yourself before class and prep for your exam in the Study Center. Practice questions from Examples & Explanations, Emanuel Law Outlines, Emanuel Law in a Flash flashcards, and other best-selling study aid series help you study for exams while tracking your strengths and weaknesses to help optimize your study time. OUTLINE TOOL Most professors will tell you that starting your outline early is key to being successful in your law school classes. The Outline Tool automatically populates your notes and highlights from the e-book into an editable format to accelerate your outline creation and increase study time later in the semester.

Surveys the computer business, with profiles of the top companies, rankings of hardware and software, product trends, and forecasts for the computer marketplace

This expert-written book covers the open source Apache MyFaces project, which is the most popular implementation of JavaServer Faces, a Web framework put forth by Sun Microsystems. The text introduces the basics of MyFaces and the JSF Standard and goes beyond fundamentals to provide a thorough understanding of the JSF lifecycle. Readers will learn how to build real-world AJAX components, and how to leverage

Oracle ADF Faces components within applications. The book is an ideal reference for professional Java and Web developers looking to develop real world applications as it focuses on practical aspects such as scalability, design, optimization and configurability.

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

The first book to focus exclusively on advanced UNIX topics along with a valuable collection of detailed and practical programming examples. Includes full coverage of many topics not found elsewhere, including fault tolerance and memory and process management.

Proceedings of a 1995 conference focusing on information storage issues in an increasingly digitized society. The first section of papers (there are 35 papers in all) describe new challenges for mass storage systems, followed by papers describing evolving storage architectures that are designed to take advantage of and support parallel, distributed environments. Other papers describe new access methods, performance modeling techniques, and new applications. Unexpected experiences with real systems and new technologies are also discussed. Lacks a subject index. Annotation copyright by Book News, Inc., Portland, OR.

Rapid Application Generation of Business and Finance Software describes a method for developing wide ranging computing applications with emerging software technologies. The pressure of the market place calls for reducing the time to market of new software applications. This book shows how to build such software faster and more reliably. Using an elegant concept of extended tools, the book presents a method for the constructive building of 'hybrid' applications. The book includes such application areas as direct marketing, banking insurance and executive information systems. The methods used adopt the latest object-oriented and client-server techniques. Rapid Application Generation of Business and Finance Software is an important book for computer scientists working on rapid application development. It is also of interest to information systems specialists.
