What do you do when you realize your mother doesn't want you... and you're only five years old? Find out in this graphic narrative as Dr. Annie Hurley shares her personal story of childhood abandonment, a life that entailed years of poverty, fear, hunger, loneliness- and unimaginable physical and sexual abuse. Annie's journey led her through over thirty different home living situations, including several years of residing with her mother, whose love and attention Annie craved above all else. Yet instead of living secure in her mother's love and protection, Annie lived in fear and emotional torment on a daily basis. Though she always believed God was real, and even caught supernatural glimpses of Him along the way, Annie could never seem to find the relationship with Him she longed for. Finally, when a high school teacher invited Annie to hear a Christian speaker, Annie prayed to receive Jesus. This life-altering event set her on a path toward healing, deliverance, and restoration, where she learned...How to renew her mind to the Word of God. How to find her true identity in Christ. How to break free from torment through the power of forgiveness. How to overcome rejection through receiving Jesus' love. How to exchange Satan's lies for God's truth. How to keep her children free from the issues of her past. How to know God as a Father to the fatherless Evil is real and it exists in this world; Annie's story proves it. More importantly, it proves that no matter how deep the enemy assaults, Jesus' love is deeper still. Nothing can separate us from that love, or the faithfulness of a heavenly Father who offers hope and healing to all who will reach out to Him and ask for His guidance to peace and freedom.

After the Apollo program put twelve men on the moon and safely brought them home, anything seemed possible. In this spirit, the team at NASA set about developing the Space Shuttle, arguably the most complex piece of machinery ever created. The world's first reusable spacecraft, it launched like a rocket, landed like a glider, and carried out complicated missions in between. Bold They Rise tells the story of the Space Shuttle through the personal experiences of the astronauts, engineers, and scientists who made it happenin space and on the ground, from the days of research and design through the heroic accomplishments of the program to the tragic last minutes of the Challenger disaster. In the participants' own voices, we learn what so few are privy to: what it was like to create a new form of spacecraft, to risk one's life testing that craft, to float freely in the vacuum of space as a one-man satellite, to witness a friend's death. A [guided tour] of the shuttlein historical, scientific, and personal terms!this book provides a fascinating, richly informed, and deeply personal view of a feat without parallel in the human story. A guide to understanding the inner workings and outer limits of technology and why we should never assume that computers always get it right. In Artificial Unintelligence, Meredith Broussard argues that our collective enthusiasm for applying computer technology to every aspect of life has resulted in a tremendous amount of poorly designed systems. We are so eager to do everything digitally--hiring, driving, paying bills, even choosing romantic partners--that we have stopped demanding that our technology actually work. Broussard, a software developer and journalist, reminds us that there are fundamental limits to what we can (and should) do with technology. With this book, she offers a guide to understanding the inner workings and outer limits of technology--and issues a warning that we should never assume that computers always get things right. Making a case against technochauvinism--the belief that technology is always the solution--Broussard argues that it's just not true that social problems would inevitably retreat before a digitally enabled Utopia. To prove her point, she undertakes a series of adventures in computer programming. She goes for an alarming ride in a driverless car, concluding "the cyborg future is not coming any time soon"; uses artificial intelligence to investigate why students can't pass standardized tests; deploys machine learning to predict which passengers survived the Titanic disaster; and attempts to repair the U.S. campaign finance system by building AI software. If we understand the limits of what we can do with technology, Broussard tells us, we can make better choices about what we should do with it to make the world better for everyone.

Doss's charming, touching, and at times hilarious chronicle tells how each of the children, representing white, Chinese, Japanese, Filipino, Korean, Mexican, and Native American backgrounds, came to her and husband Carl, a Methodist minister. She writes of the way the "unwanted" feeling was erased with devoted love and understanding and how the children united into one happy family. Her account reads like a novel, with scenes of hard times and triumphs described in vivid prose. The Family Nobody Wanted, which inspired two films, opened doors for other adoptive families and was a popular favorite among parents, young adults, and children for more than thirty years. Now this edition will introduce the classic to a new generation of readers. An epilogue by Helen Doss that updates the family's progress since 1954 will delight the book's loyal legion of fans around the world.
