Many Christians labor under the false notion that because they are saved, past wounds, hurts, and consequences from mistakes are swept away. Yet they continue to be plagued with spiritual and emotional problems. They long for healing while wondering why they are unable to break free. The answer, says inner healing expert Charles H. Kraft, is that believers need to seek healing and deliverance as steps beyond salvation. Only when Christians are freed from the bonds of oppression deep inside themselves can they walk with the closeness with Jesus they yearn for. Using a proven process he has refined through years of successful deliverance ministry, Kraft leads readers step by step to freedom--and ultimately to healing.

On Wings of Peace is an innocent love story between a Mermaid

and a Sea Gull. Though seemingly an impossible fantasy, it transcends far beyond the barriers of age and time. The story weaves itself into a profound commentary on human behavior and ends on a heart warming note that will bring both joy and tears to any reader regardless of gender or generation. This is not a children's book yet it contains no violence, sex or profanity. It's about what happens when two most unlikely characters meet and fall in love. The journey began within the creative recesses of my mind and evolved into a new dimension of truth somewhere along the way. Imagination is the key that unlocks any story worth telling. Imagination keeps us sane because we can escape into a world we create for ourselves and resolve the conflagrations of every day existence when we find a higher place where the sun always shines and the air is clean and fresh. On Wings of Peace discovers that better place we all seek. A fantastic voyage brings meaning to why we're here, what we can be, and who we are. In the end, the answer is revealed somewhere within the dream. What we believe becomes our reality, and that could be anything. Anything at all. JTL

Air power for warfighting is a story that's been told many times. Air power for peacekeeping and UN enforcement is a story that desperately needs to be told. For the first-time, this volume covers the fascinating range of aerial peace functions. In rich detail it describes: aircraft transporting vital supplies to UN peacekeepers and massive amounts of humanitarian aid to war-affected populations; aircraft serving as the 'eyes in sky' to keep watch for the world organization; and combat aircraft enforcing the peace. Rich poignant case studies illuminate the past and present use of UN air power, pointing the way for the future. This book impressively fills the large gap in the current literature on peace operations, on the United Nations and on air power generally.

A thrilling new series soars above the competition and redefines middle-grade fantasy fiction for a new generation! The seven dragon tribes have been at war for generations, locked in an endless battle over an ancient, lost treasure. A secret movement called the Talons of Peace is determined to bring an end to the fighting, with the help of a prophecy -- a foretelling that calls for great sacrifice. Five dragonets are collected to fulfill the prophecy, raised in a hidden cave and enlisted, against their will, to end the terrible war. But not every dragonet wants a destiny. And when the select five escape their underground captors to look for their original homes, what has been unleashed on the dragon world may be far more than the revolutionary planners intended . . .

Despite poverty, violence, and despair, there are angels among us, walking the streets of New York City. For Panja Jurgens's thought-provoking photo essay, New Yorkers of every stripe strapped on a pair of pure white wings and, if only for a moment, transcended their own realities to imagine the possibilities of world peace. Some put their hopes into poetic words; others revealed their feelings through gestures and poses. Photographed in a wide variety of locations long before September 11,

the images portray firefighters, nurses, artists, veterans, bikers, clerics, children, immigrants: a cross section of the peoples and cultures that make the city unique. Jurgens could not have picked a more appropriate, promise-filled place. A meditation by popular German rock star Udo Lindenberg introduces the 105 duotone photographs.

**Through a wealth of photographs and color illustrations and an informed narrative, Blue Skies, Orange Wings documents the surprisingly strong role of Dutch aircraft, airmen, designers, and airlines in world aviation in the first half of the twentieth century. In this beautiful book Ryan Noppen offers the most thorough study of the early years of Dutch commercial and military aviation published in the English language.
